Executive Biography

Phil McKinney

Vice President and Chief Technology Officer

General Manager, Gaming Business Unit, Personal Systems Group

Hewlett-Packard Company

As vice president and chief technology officer for the Personal Systems Group at HP, Phil McKinney oversees the group's long-range technical strategy and research and development. He also is general manager of the group's gaming business unit, which aligns with HP's research and development organization by providing access to the latest technologies and innovation.

Through his numerous worldwide speaking engagements, seminars and workshops, McKinney is recognized as a leading authority on technology and innovation and its impact on business, industries, economies and society.

Previously, McKinney was vice president and chief technology officer for the Network and Server Provider Business at HP, responsible for the executive chief technology officer relationship, long-range strategy and research and development for HP's largest industry vertical business segment.

Before joining HP, McKinney was engaged in day-to-day operational challenges as senior vice president and founding chief information officer for Teligent, a global provider of fixed-wireless services. At Teligent, he led the strategy development, IT infrastructure build out and ongoing operations, managing a team of more than 1,000 technology professionals.

Prior to joining Teligent, McKinney was senior executive responsible for the Communication Industry Consulting Practice at Computer Sciences Corp., where he directed consulting engagements worldwide. Earlier in his career at CSC, he oversaw the communication industry managed services division that provided mission-critical system outsourcing for more than 165 network and service providers worldwide.

McKinney currently serves on the board of directors for Signafor Inc.
