

HP iPAQ 900 SERIES BUSINESS MESSENGER

Simplify the complexity of your business and personal life.

You can depend on the iPAQ 900 Series Business Messenger to keep you connected and productive where and when your communication needs demand it.

Stay in touch when you are on the go.

This powerful mobile phone with 3G wireless technology for enhanced global communication helps you make calls and go online in countries around the world.^{1,2,3,4} Access the Internet and email with high-speed HSDPA 7.2 Mbps or integrated 802.11b/g wireless networking.^{1,2} Use your iPAQ to connect your notebook/PC to the Internet using built-in Microsoft Internet Sharing.^{1,2}

Find your way

Plan your trip and find points of interest with built-in multi-mode GPS and Google maps.⁸ Enhance GPS performance with built-in HP iPAQ GPS QK Position utility. Add real time directions with optional GPS map kit.⁷

Boost your productivity

This is the mobile email experience you've wanted. The "QWERTY" keyboard makes text entry fast and efficient. Scroll elegantly through your emails with the track wheel. Or keep your hands free while doing email^{1,2} by listening and replying to email with Cyberon Voice Commander⁶ and HP Voice Reply. Find Internet searches fast with 3G HSDPA 7.2^{1,2} Mbps speeds. Stay organized and productive with familiar Windows Mobile® applications, corporate email, and powerful line-of-business applications.

Enjoy your downtime.

Capture photos and video with the integrated 3-Megapixel camera, view and edit them with HP Photosmart Mobile, then upload¹ to Snapfish. Send instant messages¹ to co-workers, friends or family, listen to your favorite music, watch videos, or play games.

Warranty	One-year parts and labor in most regions; 90 days technical support for software in most regions. Additional offers may vary by region. ⁵

1 A standard GSM/GPRS/EDGE/UMTS/HSDPA infrastructure, Wi-Fi or other Bluetooth-enabled devices, separately purchased equipment, and a service contract with a wireless airtime provider may be required for applicable wireless communication. Wireless Internet access requires separately purchased Internet service contract. Check with service provider for availability and coverage in your area. Not all web content available. Wireless transmission speeds may vary based upon network capabilities and other conditions. Establishment and continuation of a wireless connection depends on network availability, provider support and signal strength.

2 EDGE (Enhanced Data for Global Evolution) is a global standard for wireless wide-area data communication being rapidly deployed by GSM carriers worldwide. Actual download speeds may vary. Coverage is subject to transmission limitations and terrain, system, capacity and other limitations. Not all features and service options are available in all areas.

3 Normal GSM Data Calls (CSD) are not basic GSM data services. These services may not be available via all operators, and may require separate subscription. Maximum connection speed is used in defining maximum speed. The GSM Operator may change the speed of connection and reduce time slots at its discretion if the network is congested. These actions may cause lower total data rate than the requested data rate.

4 Telephone service requires separately purchased contract with a telephone service provider with coverage in your service area. Additional fees may apply for some features, check with service provider.

5 Service levels and response times for HP Care Pack Services may vary depending on your geographic location. Restrictions and limitations apply. For details, visit www.hp.com/go/carepack.

6 The 'Read email' Voice Command feature is only available for email sent via an Exchange Server to the Outlook Inbox.

7 Sold separately or as an add-on feature.
