

HP Photosmart Express station

Overview

The HP Photosmart Express station is the industry's most advanced standalone, self-serve kiosk dedicated to producing 4×6 -inch prints in as fast as five seconds. Fast print speeds are enabled by HP Edgeline scalable printing technology. The technology built into the printhead enables the HP Photosmart Express station to deliver higher performance and greater efficiency than other comparable systems currently on the market. $^{(1)}$

Consumer benefits

- Attractive easy-to-use kiosk design and user interface.
- One-stop instant prints. Select, print and pay for photos at the kiosk itself. Photo envelopes also stocked at kiosk.
- Produce high-quality, long-lasting water-fast 4 x 6-inch prints in as fast as five seconds.
- No-compromise, six color Vivera pigment ink printing system for superior image quality.
- HP prints resist fading two to five times longer than prints from labs or competitive kiosks. Rated longest lasting prints in the history of color photography. (2)
- Create an archival CD containing digital images and included HP Photosmart Essential software – easily and quickly – right at the kiosk.
- Upload images from digital camera cards, mobile phone camera cards, USB thumbdrives, CDs, DVDs and Bluetooth® wireless technology.
- Place an order through Snapfish or HP Photosmart Essential from the convenience of home, and pick it up at any HP Photosmart Express station location.

Retailer benefits

- HP Photosmart Express uses cut sheets of paper and six individual ink cartridges to allow store staff to refill ink or paper when it is convenient for them, instead of waiting for a roll of paper or ribbon to run out.
- Holds up to 10 times more supplies capacity than comparable instant print offerings.
- Up to six times more space efficient than comparable through-put solutions.
- Minimal maintenance required resulting in lower operating costs and higher revenue.
- Advanced, comprehensive remote monitoring and reporting systems ensure uptime.
