**For Immediate Release**

**Orasi Joins HP Quality Management Ecosystem Program**

**KENNESAW, GA — December 10, 2008** — [Orasi Software, Inc.](#) today announced that it has joined the HP Quality Management Ecosystem Program. Orasi's first products to market under this program are the [JIRA Bridge for HP Quality Center](#) and the Session Initiation Protocol (SIP) for HP LoadRunner.

"Our participation in this program allows us to provide greater benefit and flexibility to our customers," said Nick Kavadellas, President and CEO of Orasi. "By developing add-ins and protocols for HP Performance Center software and HP Quality Center software, Orasi is able to extend the capabilities of these tools and deliver solutions that better fit each customer's unique needs. Customers also can use the protocols to extend the tools on their own."

Scheduled for release in the first quarter of 2009, Orasi's JIRA Bridge for HP Quality Center is a utility that synchronizes defect information between Atlassian®'s JIRA® and HP Quality Center software, enabling collaboration between development and quality assurance teams. The tool also enables users to gather metrics on round-trip issue resolution process to drive the stability and reliability of release cycles.

Orasi's SIP protocol for HP LoadRunner allows companies to ensure quality in VoIP and Unified Communications initiatives. With support for major Unified Communications platforms such as Cisco and Microsoft, Orasi's SIP protocol is able to address most environments today, and support for others will follow as the market evolves.

"VoIP and Unified Communications are becoming increasingly valuable tools for enterprises," said Jon Arnold, Principal of VoIP consultancy [J Arnold & Associates](#). "These technologies enable real-time communications, which have a distinct set of quality assurance challenges that HP LoadRunner is designed to address," Arnold added.

"In challenging economic times, organizations need to take an intelligent approach to managing the application lifecycle for cost and risk reduction," said Mark Sarbiewski, senior director of products,

Software and Solutions, HP. "Orasi's products complement HP Quality Center and HP LoadRunner as part of HP's approach to Application Lifecycle Management. This helps customers modernize their applications to better meet the needs of the business now and in the future."
