HP Telecommuter Solution – Manageability Offering for Enterprise Printing Environments

Overview

With HP telecommuter solutions, enterprises can provide remote workers with the same reliable and productive imaging and printing environment that in-house employees receive. Since the launch of this offering in spring 2009, HP is now offering HP Web Jetadmin monitoring and management capabilities for IT managers supporting remote employees. To meet the increased needs in telecommuting in enterprise workforces, companies can now accurately track and report telecommuter printing and imaging through one simple solution.

IT management for telecommuters

With HP Web Jetadmin, IT managers can directly manage their telecommuters' printing activity, including:

- Monitoring the device by noting its presence and identifying it within the network;

- Viewing the status of the device and receiving reports on the current supply level, eliminating the worry of running out of toner or ink;

- Keeping track of page counting so the enterprise can better manage costs and environmental impact; and

- Accessing USB-connected printers via a VPN-connected PC.

Solutions for telecommuters

HP addresses the productivity needs of telecommuters with printers that offer lower energy consumption and a reduced cost per page as compared to competitive models.[1] HP makes it easy for users to work more effectively – no matter the location. With highly reliable and productive multifunction printers, HP offers choices for remote workers where printing is critical.

HP also satisfies IT managers' requirements for easy and cost-effective deployment by providing IT-friendly drivers with a small footprint, a silent install and the ability to configure devices for default duplex or two-sided printing or black-only printing.

Product options include the HP Officejet Pro 8500 All-in-one (AIO), HP Officejet Pro 8500 Wireless AIO,[2] HP Color LaserJet CM 1312nfi MFP or HP LaserJet M1522nf MFP, HP LaserJet M1319f MFP plus HP original supplies and three-year Next Business Day Exchange Support.
