Overview

HP and Pharos Blueprint Enterprise Printing Security and Job Accounting Solution helps organizations lower their costs on office printing. It enables enterprise customers to efficiently and more securely manage imaging and printing resources to control costs, increase convenience and measure usage with flexible applications. This solution is the industry-leading job accounting solution for large businesses and organizations. Furthermore, HP and Pharos Blueprint Enterprise Printing Security and Job Accounting Solution is a server-based software solution that works with HP printing devices.

Key features and benefits

- Easily develop and implement printing policies, such as auto-duplexing with tasks of 50 pages and more, to control usage and costs

- Track local and network print/copy jobs for increased accountancy and management

- Decrease volume of local printers and improve the utilization of network devices

- Maximize convenience and security by leveraging industry-leading pull-printing technology

- Work confidently with advanced security features such as user authentication via PIN, network login or by swiping an ID card

- Direct allocation of print and copy costs to specific departments for efficient cost management

- Effectively deploy imaging and printing devices with an intelligent asset consolidation system

Availability

HP and Pharos Blueprint Enterprise Printing Security and Job Accounting Solution is expected to be available in October 2009 in United States and Canada. Contact an HP sales representative for pricing and other information.
