

HP Government Case Processing Accelerator Solution

Overview

The HP Government Case Processing Accelerator Solution enables government agency caseworkers to capture and process critical case-related information at the source. Designed to meet the rising influx of citizen services and requests, this end-to-end solution manages the capture, flow and retrieval of information in real time, helping reduce processing times, error rates and lost documents.

Powered by HP multifunction printers (MFPs), the HP Government Case Processing Accelerator Solution easily integrates into existing imaging and printing environments to help government agencies route sensitive data directly into business applications. Once a document is captured, the caseworker can verify that the information is correct before submitting the data for integration with the case management system or other business applications. This solution can automatically recognize a document's attributes and extract important data from specific fields for instant updates in existing business applications, reducing costs and error rates associated with manual data entry and centralized scanning. Authorized case workers across the agency can retrieve, view and use the information just minutes after the document is captured and processed, increasing productivity, lowering costs and reducing delays.

Key features and benefits

- Enables quicker responses to citizen requests with rapid access to caseworker information, while helping to ensure data protection and privacy.
- Allows users to digitize and upload data and documents to the provider's electronic document management systems (EDMS) and enterprise content management (ECM) or other case management systems in minutes.
- Helps ensure real-time document capture at point of origin.
- Automatically recognizes document attributes and critical data that can be extracted in specific fields for quick updates in existing applications.
- Leverages HP's industry-leading technology infrastructure capabilities and services to help ensure future institutional growth and sustain a cost-effective imaging and printing environment.
- HP Government Case Processing Accelerator Solution is enabled by any of the following: HP LaserJet M3035 MFP; HP LaserJet M4345 MFP; HP Color LaserJet CM4730MFP; HP LaserJet M5035 MFP; HP Color LaserJet CM8050 MFP; HP Color LaserJet CM8060 MFP; HP LaserJet M9040 MFP; HP LaserJet M9050 MFP; HP 9250c Digital Sender.

Pricing and availability

Contact an HP sales representative for pricing and services information. Expected to be available for worldwide purchase in March 2009.
