Overview

The HP Deskjet F4400 All-in-One Series is an easy-to-use and affordable print, copy and scan solution with a modern design and intuitive control panel. Built for simplicity and quick speeds, this energy-efficient all-in-one series offers several helpful features that make it ideal for users who prefer hard copy prints of articles, emails, recipes, web content and photos.

In addition, customers can help conserve resources with the ENERGY STAR®-qualified HP Deskjet F4400 All-in-One Series printer with the paper-saving option that allows users to print multiple pages on both sides of the paper.

Key features and benefits

- Make ink replacement quick, simple and convenient with easy access to cartridges and an ink level gauge that shows when ink is running low.

- Conserve resources – the HP printer is made of 20 percent recycled materials, and HP 60 ink cartridges are made from at least 50 percent recycled plastics from used HP cartridges collected through HP Planet Partners and other sources, such as water bottles.

- Use the "Eco-tips" button in the HP Solution Center to learn more ways to print responsibly, conserve resources and recycle.

- Easily identify features that reduce environmental impact with the HP Eco Highlights label.

- Enjoy convenient and responsible ink cartridge recycling at no additional cost through HP Planet Partners.[1]

- Print what's on the page – HP Smart Web Printing allows users to select and organize text, graphics and photos from multiple web pages to print exactly what is needed on a single page, eliminating paper waste.[2]

- Get three times more black printed pages and two times more color printed pages using replacement high-capacity ink cartridges.[3]

- Receive cash back for printers and other unwanted technology equipment or, if there is no value, responsibly recycle them through the HP Consumer Buyback and Planet Partners Recycling Program.

Technical specifications

- Print speeds of up to 28 ppm black and up to 22 ppm color[4]
