Empower your business with the new standard for mobile productivity and business ruggedness with a notebook that passes rigorous military standard testing.<sup>24</sup>

Windows®. Life without Walls™. HP recommends Windows 7.

### A new standard

Take along the business notebook that's durable without weighing you down. Starting at 4.7 lb/ 2.12 kg and featuring a 14.0-inch diagonal LED-backlit HD<sup>7</sup> display and industry-leading battery life<sup>26</sup> with up to 24 hours on a properly configured HP EliteBook 8440p with Ultra Capacity Battery. This notebook is designed to meet the tough military standards (MIL-STD 810G)<sup>24</sup> for vibration, dust, humidity, altitude, and high temperatures.

### Make choices

Intel® Core™ i7⁴ and Intel® Core™ i5⁴ processors deliver intelligent technology for outstanding performance on the most demanding tasks. Choose between integrated¹⁰ or discrete graphics with dedicated video memory for more graphics intensive environments.

### Make connections

Connect to other devices in a snap. With DisplayPort, you get sharper, deeper images compared to other display connector technology. And an eSATA connector lets you connect optional external RAID array, hard drives or optical drives for fast and easy storage.<sup>21</sup>

### Keep moving

Integrated HP Mobile Broadband<sup>9</sup> allows you to conveniently access the internet and e-mail in more places. The Global Positioning System (GPS)<sup>28</sup> uses satellite-based technology to determine your 3D position (latitude, longitude and altitude).

## HP Professional Innovations help you focus on your business

Built to last. With HP DuraCase, which includes a magnesium display enclosure and magnesium alloy chassis, you get a durable device that has been tested at extreme temperatures.<sup>24</sup>

Built to simplify. HP QuickLook 3 provides read and write capability of email, calendar, task and contact information in seconds at the touch of a button, without having to boot up.<sup>12</sup>

Built to conserve. HP Power Assistant<sup>14</sup> measures and logs reported platform energy usage and delivers comprehensive reporting (time, watts, energy cost and carbon footprint).

# Windows<sup>®</sup>. Life without Walls <sup>™</sup>. HP recommends Windows 7.

### EliteBook 8440p Notebook PC

## Windows<sup>®</sup>. Life without Walls <sup>™</sup>. HP recommends Windows 7.

- 1. This system may require upgraded and/or separately purchased hardware and/or a DVD drive to install the Windows 7 software and take full advantage of Windows 7 functionality. See <a href="http://www.microsoft.com/windows/windows-7/">http://www.microsoft.com/windows-7/</a> for details.
- Certain Windows Vista product features require advanced or additional hardware. See <a href="https://www.microsoft.com/windowsvista/getready/hardwarereqs.mspx">www.microsoft.com/windowsvista/getready/hardwarereqs.mspx</a> and <a href="https://www.microsoft.com/windowsvista/getready/capable.mspx">www.microsoft.com/windowsvista/getready/capable.mspx</a> for details. Windows Vista Upgrade Advisor can help you determine which features of Windows Vista will run on your computer. To download the tool, visit <a href="https://www.windowsvista.com/upgradeadvisor">www.windowsvista.com/upgradeadvisor</a>.
- 3. Windows® XP Professional is preinstalled on this system and includes end user rights and media for Windows 7 Professional. You may only use one version at a time. You must back up all data (files, photos, etc.) before uninstalling and installing operating systems to avoid loss of your data.
- 4. Dual/Quad Core is designed to improve performance of certain software products. Not all customers or software applications will necessarily benefit from use of this technology. 64-bit computing on Intel architecture requires a computer system with a processor, chipset, BIOS, operating system, device drivers and applications enabled for Intel® 64 architecture. Processors will not operate (including 32-bit operation) without an Intel 64 architecture-enabled BIOS. Performance will vary depending on your hardware and software configurations. Intel's numbering is not a measurement of higher performance.
- 5. Double-layer discs can store more data than single layer discs. However, double-layer discs burned with this drive may not be compatible with many existing single-layer DVD drives and players. LightScribe media required and sold separately. LightScribe creates a monochrome image. Note that DVD-RAM cannot read or write to 2.6GB single-sided/5.2 GB double-sided version 1.0 media. Don't copy copy-right protected materials.
- 6. As Blu-Ray is a new format containing new technologies, certain disc, digital connection, compatibility and/or performance issues may arise, and do not constitute defects in the product. Flawless playback on all systems is not guaranteed. HD-DVD movies cannot be played on this device. Models with integrated graphics require Mobile Intel GM45 Express chipset and Windows Vista to support the Blu-Ray DVD drive; models with discrete graphics support it with either Windows Vista or Windows XP.
- 7. HD content required to view HD images
- 8. Wireless access point and Internet service is required and is not included. Availability of public wireless access points limited
- 9. WWAN wireless technology requires separately purchased wireless data service contracts. Check with local service provider for coverage and availability in your area. Connection speeds will vary due to location, environment, network conditions, and other factors.
- 10. Shared video memory (UMA) uses part of the total system memory for video performance. System memory dedicated to video performance is not available for other use by programs.
- 11. For the use cases outlined in the DOD 5220.22-M Supplement.
- 12. HP QuickLook 3 is accessible when the notebook is off in Windows XP, Windows Vista or Windows 7-based systems; not supported from hibernation. Timing may vary depending on the system configuration. To enable the feature following the removal of the battery, reboot the notebook prior to subsequent use.
- 13. HP QuickWeb is accessible when the notebook is off in Windows XP, Windows Vista or Windows 7-based systems; not supported from hibernation. Internet access required. Timing may vary depending on the system configuration. To enable the feature following the removal of the battery, reboot the notebook prior to subsequent use.
- 14. Power calculations and cost calculations are estimates. Results will vary based on variables, which include information provided by the user, time PC is in different power states (on, standby, hibernate, off), time PC is on battery or AC, hardware configuration, variable electricity rates and utilities provider. HP advises customers to use information reported by HP Power Assistant for reference only and to validate impact in their environment. Environmental calculations were based on U.S. EPA eGrid 2007 data found at <a href="https://www.epa.gov/egrid/">www.epa.gov/egrid/</a>. Regional results will vary.
- 1.5 Internet access required
- 16. Maximized dual-channel performance requires SODIMMs of the same size and speed in both memory slots
- 17. Maximum memory capacities assume Windows 64-bit operating systems or Linux. With Windows 32-bit operating systems, memory above 3 GB may not all be available due to system resource requirements.
- 18. For hard drives, GB = 1 billion bytes. Up to 8 GB (for XP), 10 GB (for Vista) or 15 GB (for Windows 7) of system disk is reserved for the system recovery software.
- 19. The term "10/100/1000" or "Gigabit" Ethernet indicates compliance with IEEE standard 802.3ab for Gigabit Ethernet, and does not connote actual operating speed of 1 Gb/sec. For high speed transmission, connection to a Gigabit Ethernet server and network infrastructure is required.
- 20. Fast Charge Technology recharges your battery up to 90% within 90 minutes when the system is off. Fast Charge Technology does not apply to the HP Ultra-Capacity battery.
- 21. Sold separately or purchased as an optional feature.
- 22. 60 day trial period. Internet access required to receive updates. First update included. Subscription required for updates.
- 23. The LoJack agent is shipped turned off, and must be activated by customers when they purchase a subscription. Subscriptions can be purchased for terms ranging from one to four years. Service is limited, check with Absolute for availability outside the U.S.
- 24. Testing was not intended to demonstrate fitness for DOD contracts requirements or for military use. Test results are not a guarantee of future performance under these test conditions.
- 25. 3 year limited warranty or 1000 cycles. Battery cycles is the total number of full charge/discharge cycles a battery yields before it can no longer hold a useful amount of charge. For more information visit: http://h20000.www2.hp.com/bizsupport/TechSupport/Document.jsp?lang=en&cc=us&objectID=c00596784
- 26. Up to 24 hours requires HP EliteBook 8440p configured with Intel Graphics Media Accelerator HD, optional SSD, 9-cell primary battery and separately purchased Ultra Capacity Battery.

  Battery life will vary depending on the product model, configuration, loaded applications, features, use, wireless functionality and power management settings. The maximum capacity of the battery will naturally decrease with time and usage. See MobileMark07 battery benchmark www.bapco.com /products/mobilemark2007 for additional details.
- 27. HP SkyRoom supported on p-series with a trial version with online purchase/activation.
- 28. GPS access requires an unobstructed path to multiple satellites. Performance may be affected if/when used inside of buildings, bridges or heavily congested metropolitan areas. Requires separately purchased GPS navigation software available from multiple GPS applications.
- 29. Intel® Turbo Boost technology requires a PC with a processor with Intel Turbo Boost capability. Intel Turbo Boost performance varies depending on hardware, software and overall system configuration. See www.intel.com/technology/turboboost for more information.
