

# HP Software Services Help Clients Accelerate Time to Value and Reduce Costs for Optimized IT Performance

## Overview

Chief information officers (CIOs) and IT managers are looking to reduce the complexity of their IT systems, lower the risk of poorly performing business-critical applications and optimize existing assets. To accomplish this, they need to increase visibility, insight and control of managing IT investments.

Gaining real-time visibility and control over IT (regardless of location or the service delivery mechanism) enables CIOs to rapidly respond to changing enterprise requirements with greater precision.

[HP IT Performance Suite](#) captures and measures IT performance with a multifaceted, consolidated view into an organization's technology environment. It systematically displays critical IT key performance indicators (KPIs) into a personalized [HP Executive Scorecard](#) encompassing Application Development, Infrastructure and Operations Management, Security, Information Management, and Financial Planning and Administration.

HP Software Services provide clients with comprehensive consulting, Software as a Service, education and support to design, implement and measure IT performance. Services offered for the HP IT Performance Suite include:

- [HP Strategic Advisory Services](#) help clients accelerate the time-to-value of the HP IT Performance Suite by defining right approach across people, process, IT operating models, technology roadmaps and KPIs based on specific enterprise priorities. HP Software Services leverages this information to develop a customized and actionable roadmap for clients.
- [HP Solution Consulting Services](#) can help reduce costs and speed deployment of the HP IT Performance Suite for clients with expert design and deployment of the HP Executive Scorecard. The Executive Scorecard gathers data from HP management solutions and third-party sources, enabling IT decision makers to rapidly respond to market and business changes. HP professionals also can implement and integrate

HP software products that make up the IT Performance Suite such as [HP Asset Manager](#), [HP Project and Portfolio Management](#) and [HP Financial Planning and Analysis](#).

- [HP Software as a Service \(SaaS\)](#) can reduce capital expenditures, accelerate time-to-value, and improve productivity of limited IT resources for clients. HP IT Performance Suite solutions available on SaaS include HP Asset Manager and Project and Portfolio Management, which can help clients rapidly address key IT responsibilities including strategy, applications, operations and security on predeployed infrastructure.
- [HP Software Education Services](#) help accelerate user adoption of HP software with flexible training venues for clients such as virtual, on-demand, instructor-led custom training and simulations as well as onsite classes. HP Software Education offers a curriculum that covers the entire HP Software product portfolio.
- [HP Premier Support Services](#) improve cost predictability, maximize return on software investments and proactively resolve support issues by managing ongoing changes against service-level commitments for clients.
