HP Access Control Printing Solution

An unmanaged print environment can be a risk—to both profits and security. The signs are recognizable: stacks of unclaimed print jobs, sensitive documents left unattended, jobs routed to inappropriate devices and mobile users struggling to access a printer. HP offers four solutions tailored to fit your enterprise's specific needs. HP Access Control Printing Solutions are simple, effective, and offer all the tools you need to slash print costs and keep your data secure.

What if you could...

Cut print costs across the enterprise with rules-based printing and intelligent job routing?

Enhance the security of networked printers by easily authenticating devices and users?

Increase returns on printing investments by tracking use per device, user and department?

Offer mobile workers and print-reliant departments the access and features they need?

Change behavior without sacrificing speed, convenience or the quality of output?

Solution at a glance

Create a less wasteful, more secure print environment with HP Access Control Printing Solutions. HP Access Control combines cost controls and security features with the simple operation that workers demand. And it supports a variety of different HP single-function printers, MFPs and select Canon MFDs. Plus, HP AC is completely scalable, so you can customize your plan to fit the needs of your unique enterprise.

Intelligent Print Management—Manage print output

Create custom printing rules that enforce your enterprise's cost-cutting goals, compliance needs and green initiatives. Assign duplex (two-sided) printing as the default to save paper, restrict color printing to only those who need it, and balance device use with automatic job routing.

Job Accounting—Audit and track print and copy use across the enterprise

Track the use of devices and supplies across the enterprise. Apply that information to allocate print costs, motivate employees to print smarter, and provide IT with the necessary data to forecast future print fleet use.

Secure Pull Printing—Empower mobile users and increase overall print efficiencies

Allow users to dynamically print to the network and "pull" jobs to any solution-enabled HP device. Pull printing virtually eliminates unclaimed documents and increases the efficiency of mobile workers.

Secure Print Authentication—Quickly authenticate users at the device

Protect your network print devices with robust authentication features that integrate with your existing network credentials (i.e., LDAP, Active Directory). Increase document security by requiring user authentication prior to printing, copying, e-mailing or scanning at the device.
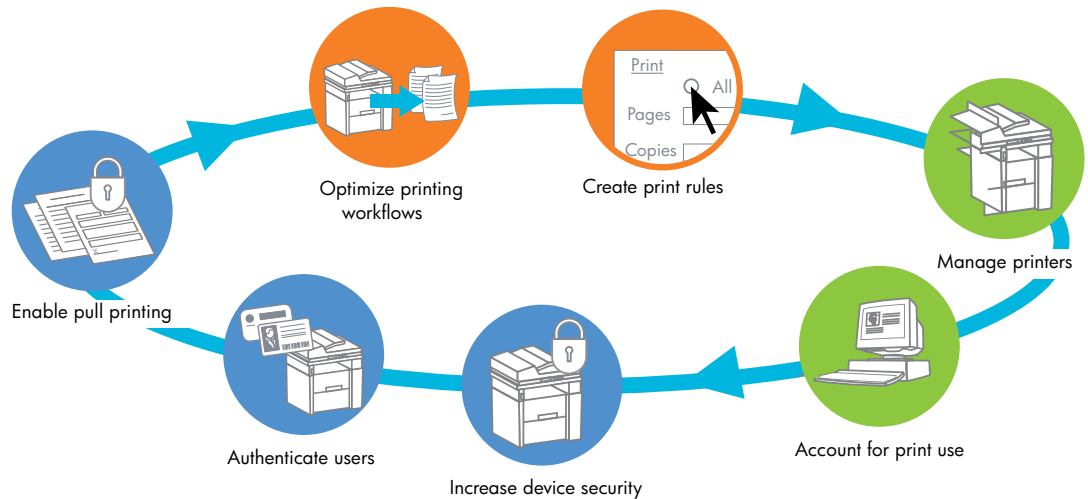

Secure LRS Connector—Integrate with UNIX/Linux-based environments

Extend HP AC applications beyond Windows®—to include Unix- or Linus-based environments—and grant complete printer authentication and tracking on LRS VPSX servers.

When a large pharmaceutical company started to notice signs of an unmanaged print environment—confidential documents left exposed at the printer and employees resisting the complicated authorization steps—it turned to HP. HP Access Control solutions successfully reined in both the risk and the resistance. Now jobs are retrieved only at the device and encrypted data provides an extra layer of protection. Plus, the simple badge authorization is easy and stress-free for employees.

Enable pull printing

Optimize printing workflows

Create print rules

Manage printers

Account for print use

Increase device security

Authenticate users

Why HP?

HP is recognized as a global leader in imaging and printing solutions for large organizations. HP offers technical expertise, and reliable products and solutions sets, that allow customers to benefit from:

- Consulting services, including procurement, installation, management, and support that can be customized to enhance your organization's effectiveness
- Relationships with industry-leading solution providers
- Powerful solutions to optimize your environment, improve the bottom line, and reduce your environmental impact

Get started

Contact your local HP representative to:

- Set up a workshop with HP to assess your specific business needs.
- Establish a plan to implement the best solution for today and into the future.
- Identify an environmental approach that can help your company save money.

HP three-part approach

HP works with you to assess, deploy and manage an imaging and printing environment tailored to meet your business needs, while helping you reduce costs, conserve resources and simplify document-intensive processes. HP's three-part approach:

Optimize infrastructure	Manage environment	Improve workflow
HP can help you achieve a balance between your total cost of printing and your needs for user convenience and productivity.	Working together, HP can help you maintain your optimized infrastructure while improving business efficiency and tightening security.	By streamlining your document-intensive processes, HP can help you deliver a more efficient environment for capturing, managing, and sharing information.
