HP Scitex FB7500 Industrial Press Upgrade Kit

Do more with your existing industrial press when you purchase the HP Scitex FB7500 Upgrade Kit. This kit provides everything you need for a smooth upgrade to expand your media versatility with the ability to print on more substrates. Increase your productivity using new HP FB225 Scitex Inks and the new POP55 print mode. Gain more efficiency using the new hot folders and job queue features, and increase your uptime using enhanced HP Scitex Print Care tools and services.
Increase your versatility and productivity

- Expand media span with new HP FB225 Scitex inks, and avoid cracking and chipping on corrugated media.

- Add new applications using the new features: Image 2 and Saturation control.

- Produce more with fast POP55 quality printing, offering a 15% throughput improvement over POP48.

- Enjoy high throughput with cross-hatch level adhesion on plastics with low cycle times and no pretreatment.

Achieve greater workflow efficiency

- Easily drop files for print, and print them in order automatically, with hot folders and job queue features.

- Achieve edge-to-edge printing with minimal operator intervention.

- Print efficiently via in-line Saturation Control for backlit applications, without going back to the RIP and with no reduction on throughput.

Saturation Control feature for a productive and efficient way to print backlit applications

Maximize your uptime with HP Scitex Print Care

- Prevent problems before they occur with the maintenance scheduler, which now also offers interactive wizards

- Gain enhanced diagnostics—step-by-step operator guidance for troubleshooting and machine problems diagnostic.

- Get remote phone assistance from a technician who can see your press on camera to reach resolution in real time.[1]

[1] **The remote HP technician may work directly with your operator, or with your HP Authorized Channel Partner.**
