Paul Evans

Worldwide Lead, Application Transformation
Solutions, Enterprise
Hewlett-Packard Company

Paul Evans is worldwide lead for Application Transformation Solutions for HP.

Evans has worked within the IT industry for many years, starting his career as a software developer before moving to positions with Digital, Compaq and HP.

Evans has a passionate interest in the future of applications and their inherent architectures, focusing on the business benefits that the technology can bring. His passion began with his work on the adoption of Ethernet-based networks through client servers.
